Bio

Web and Software Developer currently located in Boise, Idaho. Looking for remote work.

Experienced with front-end and back-end, automation scripts, SEO, and accessibility.

Resume

Web Developer Team Lead + Android Developer - *HomeCU*

Web Developer Team Lead Responsibilities

- Provided direction on website development processes, project management, hiring, and client RFPs.
- Provide assistance and mentorship to the web development team.
- Designed and developed website templates.
- Upgraded the teams technologies to improve turn-around time.
    - Templating in Pug
    - Sass
    - Wrote scripts to automate repetitive processes
    - Feed JSON into templates
- Built company's custom web CMS product using CraftCMS
    - Researched and implemented cost-effective hosting and deployment solutions for the CMS.
    - Created an extensive number of features to meet all of HomeCU's client needs.
- Developed improved secure form product that cut development time immensely and added new javascript functionality.
- Helped interview, hire, and train 2 new web developers.
- Wrote scripts to solve complex problems.

- - Example: Output a .csv of specific DNS information when given a list of input.
  - Heavily documented everything for an ease in onboarding employees.
  - Rapidly made more than one hundred inaccessible credit union websites compliant with ADA and WCAG.
  - Maintained hundreds of client websites, taking care of any client requests.

Android Developer Responsibilities
- Built new variants of the app for new and existing clients.
- Maintained batch updates using Fastlane's Ruby API.
- Fixed and debugged issues in the existing apps.
- Created Google Play Store entries for app releases.
- Did all this while continuing to build new features to the web cms, and training the web team to take over my projects and the next years goals.

Web Developer / Media Management Contractor (Part-Time) - *The Book Editor Show*
- Rebuilt Wordpress site
- Make technical SEO improvements
- Build video thumbnails with Adobe Photoshop
- Edit videos from the Podcast with Adobe Premiere
