EXPERIENCE

NIC Idaho (Access Idaho) — *Java Web Developer*

04/2021 - Current

HomeCU — *Android Software Engineer*

08/2020 - 12/2020

Worked on debugging, problem solving, resolving issues, and automating build and deployment processes for Android Apps written in Java. Worked on an agile team, and participated in peer reviews.

Tools and languages used in this role were Android Studio, Java, Ruby, Python, Bash and Git.

HomeCU — *Web Developer*

11/2017 - 12/2020

Worked as team-lead for a web design team, ranging from back-end web development and deployment solutions to front-end UI, cross-browser responsive website design, and meeting accessibility compliance with ADA and WCAG.

Built an industry targeted CMS solution to allow credit unions to more effectively manage their websites, while increasing project turn-around time.

Designed new products and solutions. Set technical goals for the department. Trained and mentored a team to meet those goals. Worked with managers to improve and automate processes.

Raven International Publishing — *Website Manager*

01/2017 - 05/2017

Redesigned and managed a WordPress site with consideration to technical SEO. Created graphic assets with Adobe PhotoShop and edited Podcast videos with Adobe Premiere.
